

## STUDED TYRES

Studded tyres may be used during the event. They must be conformity with the following regulations:

- The studs shall be solid, cylindrical and flatcut.
- The cross section of the studs must form a full circle at every point.
- The stud is not allowed to be tabular at any point.
- The body of the stud must be homogenous and is not allowed, under any circumstances to form a tube or hole.
- Maximum diameter of the flange is 9 millimeters.
- The weight of the stud is limited 4 grams.
- The studs must be mounted in to the tyres from outside.
- The number of studs must not exceed 20 per any decimeter of the wheel circumference.
