Safety and tracking equipment principles

- The competitors are responsible for installing of the equipment by themselves. The same device is used during both: the reconnaissance and the rally. During the reconnaissance the device has to be installed in visible place to assure that Marshals and other Officials could identify it.
- Safety and tracking equipment and information sticker has to be installed into the rally car before the start of the rally.
- The system should be installed by the crew and must be shown to the scruteneers at special area (appendix No.6) on 23.01.2015. from 12:30 until 14:20. They will check if GPS safety equipment and information sticker is installed properly. Competition cars not equipped with the safety and tracking device will not be allowed to start.
- GPS units and brackets should be dismantled from the rally cars by the crew in special zone (appendix No.6) before TC 12. In the case of the retirement GPS equipment shall be delivered to the provider of the GPS units until 24.01.2015. at 17:30 in Rally HQ.
- After the stopping in the SS, the crew must press „SOS“ or „OK“ buttons in the 30 second time and must inform Rally HQ by telephone (telephone number on the information sticker).
- During the race the crew must have mobile phone switched on, or must switch it on in 60 seconds after stopping in SS (for a longer than a 30 sec period of time) in order that rally centre are able to contact the crew. For the violations of "OK" and "SOS" signals usage, the crew will be penalized.

Attention! The device during its operating time can spread specific radiomagnetic interferences what is typical for GSM connections. We kindly recommend to put other devices who can be sensitive for this Organisers issued equipment in maximum distance from the installed Organisers equipment.
