

STUDED TYRES

Studded tyres may be used during the event. They must be conformity with the following regulations:

The studs shall be solid, cylindrical and flatcut.

The cross section of the studs must form a full circle at every point.

The stud is not allowed to be tabular at any point.

The body of the stud must be homogenous and is not allowed, under any circumstances to form a tube or hole.

Maximum diameter of the flange is 9 millimeters.

The weight of the stud is limited 4 grams.

The studs must be mounted in to the tyres from outside.

The number of studs must not exceed 20 per any decimeter of the wheel circumference.
